WITKOWITZ GROUP COMPANY

VÍTKOVICE  
ENERGETICKÉ  
STROJÍRENSTVÍ

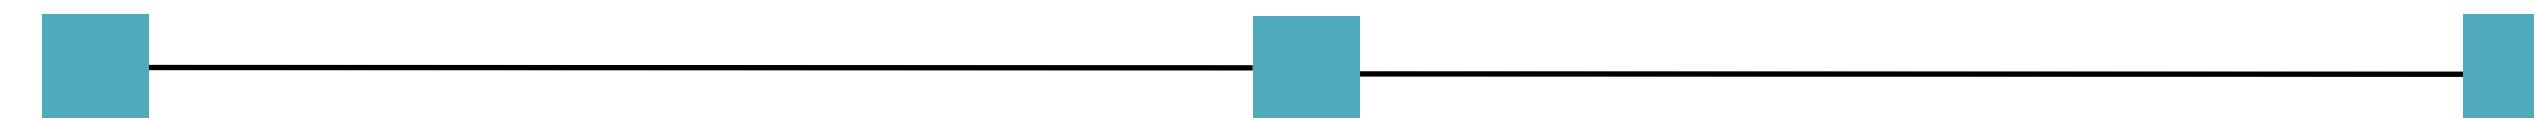

## Introduction

The company VÍTKOVICE ENERGETICKÉ STROJÍRENSTVÍ a.s., continues a long tradition in the production of pressure and non-pressure parts of power plants, parts for the chemical and petrochemical industry, parts for the steel industry and more.

In addition to the production of complete parts, the company offers various forms of cooperation, especially in the form of bending of plates, bending of pipes, welding, heat treatment, machining.

# HISTORY

Historical milestones of the company VÍTKOVICE ENERGETICKÉ STROJÍRENSTVÍ a.s.

**1888**

Beginning of the construction of the boiler room building, completed in 1890. Establishment of a separate operational department of the boiler room, or Kesselfabrik, equipped with special machines designed for the production of boilers.

**1978**

Production of the first compensator for a nuclear power plant. Introduction of the nuclear program - especially the production of rings for the internal installation of the reactor and VVER 400 MWe volume compensators.

**2018**

The continuation of more than a century of production this year becomes the company VÍTKOVICE ENERGETICKÉ STROJÍRENSTVÍ a.s., which continues the traditional production of pressure systems for energy equipment, including boiler drums, components for nuclear energy, storage tanks and parts for metallurgical production.

# PORTFOLIO

Production of pressure and non-pressure parts of power plants (conventional and nuclear), components for the chemical, petrochemical and steel industries. Services in the field of bending, sheet metal bending, pipe bending, welding, machining of large forgings and production of heavy steel structures and bridges.

## Stogare tanks

We offer manufacturing of storage tanks for storage of liquefied gasses and their gaseous phases, chemicals and liquids. Volume of manufactured tanks is up to 125 000 m<sup>3</sup>.

## Power industry, nuclear power

The company holds certificates for the production of pressure equipment and piping systems according to PED 2014/68 / EU, EN 13445, EN 13480, EN 12952, EN 12953, AD 2000 HP0 / W0, EN765-4, ASME „S“, ASME „U“, ASME „U2“.

## Chemical, Petrochemical Industry

In the chemical industry, we offer the production of exchangers, absorbers, reactors, tanks, columns and more.

# PORTFOLIO

Production of pressure and non-pressure parts of power plants (conventional and nuclear), components for the chemical, petrochemical and steel industries. Services in the field of bending, sheet metal bending, pipe bending, welding, machining of large forgings and production of heavy steel structures and bridges.

## Tube bending shop

Cold and hot bending of pipes and profiles. We also produce pressure and non-pressure parts and units. We offer automatic and manual welding, machining, heat treatment, blasting, metallization, surface treatment.

## Industrial products

Our company is engaged in manufacturing of parts for other industrial sectors, above all, it is manufacturing of equipment for steelworks, such as blast furnace shells, hot blast stove shells, material hoppers, casting ladles, arc furnaces, etc.

## Heavy steel structures and bridges

We offer complete production of steel structures and bridges. We cover the production process of steel structures from the beginning to the end with our own capacities. We laser cut metal sheets, prepare weld edges, bend material ourselves. We weld both manually and automatically under flux.

## STORAGE TANKS

# Spherical, cylindrical tanks

Since 1990, a total of 95 tanks have been produced. The volume of manufactured tanks ranges from 300 m<sup>3</sup> to 125,000 m<sup>3</sup>.

## Division of storage tanks:

- Pressure storage tanks
- Spherical pressure tanks
- Cylindrical storage tanks
- Cylindrical mounded tanks
- Non-pressure storage tanks
- Large-volume storage tanks with a volume of up to 125,000 m<sup>3</sup>

## PARTS OF THERMAL POWER STATIONS

## High pressure pipes and chambers

Since 2000, pipes and headers have been manufactured for more than 20 projects.

Supplies for projects for Elbistan (Turkey), Venezuela, Jiant Lin (China), Skoghall (Sweden), Itata (Chile), Runcorn (UK), Termoli (Italy), Santa Fe (Chile), Grande RB (Canada), Tušimice (Czech Republic), Kymi (Finland), Mondi Syktyvkar (Russia), Pärnu (Estonia), Facture (France), Mellach (Austria), Örebro (Sweden), Kiröskoski (Finland), Ledvice (Czech Republic), Prunéřov (Czech Republic), Biokotel Žarnovica (Slovak Republic), Domoradice (Czech Republic), Kutná Hora (Czech Republic), Rovinari (Romania), Walsum (Germany), Yunus Emre (Turkey), Värtaverket (Sweden), Riikinvoima (Finland), Zofiowka (Poland).

## PARTS OF THERMAL POWER STATIONS

## Power industry

Our company holds certificates for the production of pressure equipment and piping systems according to PED 2014/68 / EU, EN 13445, EN 13480, EN 12952, EN 12953, AD 2000 HP0 / W0, EN764-5, ASME „S“, ASME „U“, ASME „U2“.

## Nuclear power

In the field of nuclear energy, we offer the production of pressure parts, heat exchangers, steam generators, etc.

# BOILER DRUMS

## EQUIPMENT FOR THE CHEMICAL INDUSTRY

# Chemical and petrochemical Industry

**Product types:**

- Pressure and non-pressure tanks
- Heat exchangers
- Reactors
- Absorbers
- Columns

**Other products for the chemical and petrochemical industries:**

- Pressure vessels
- Condensators
- Separators
- Material hoppers
- Filters etc.

Equipment for the chemical industry

## Reactor R4001

Weight 368 t

Production standard EN 13445 + PED 97/23 / EC

Material P355NL1, P460

Dimensions 45.5 m x 4.8 / 7.62 m (L x Ø)

Delivery in 6 parts

## Reactor R4301

Weight 161 t

Production standard EN 13445 + PED 97/23 / EC

Material P355NL1

Dimensions 40 m x 4 / 6.3 m (L x Ø)

## Cleaning container PPB

Weight 60.7 t

Production standard EN 13445 + PED 97/23 / EC

Material P275NL1, P355NL1

Dimensions 35 m x 4 / 5.5 m (L x Ø)

## PIPE BENDING SHOP

# Pipe bending shop

- Pipe systems acc.to ČSN 13 2604, for piping acc.to ČSN 13 1020 and ČSN 13 1030
- Pipe heating systems for steam boilers (previous standards ON 07 0627 and ON 07 0629), acc.to drawing documentation and customer requirements
- Standards acc.to DIN - AD W0 / TRD 100, ISO 9001, ASME

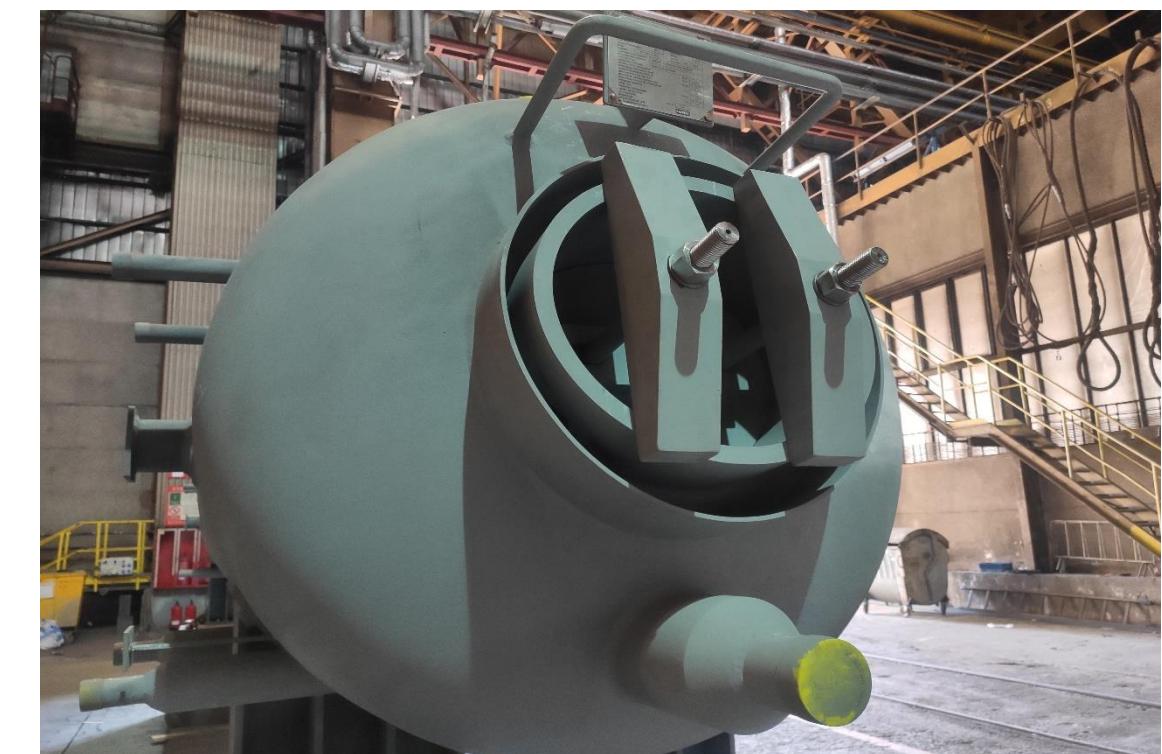

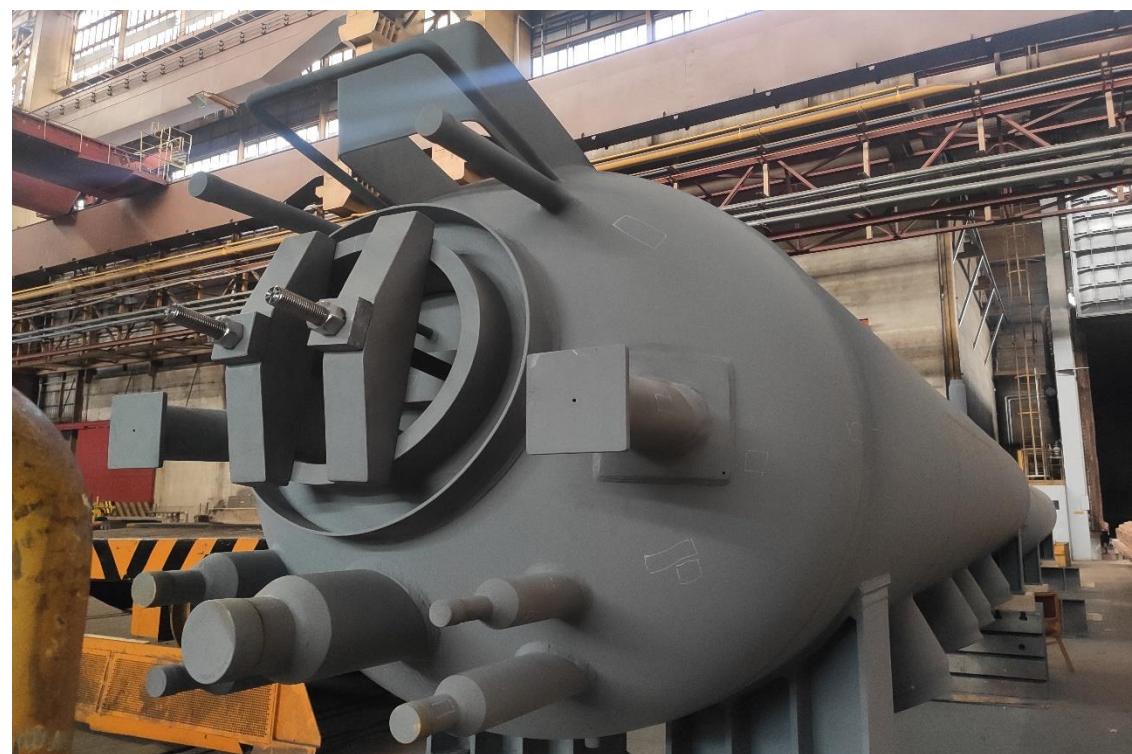

# SELECTED REFERENCES

**Place:** Zagreb, Croatia

**Year:** 2020

Production of 2 low-pressure and 2 high-pressure boiler drums. These are mirrored boiler drums for HRSG (Heat Recovers Steam Generator) for the new, highly efficient combined cogeneration unit EL-TO CCPP, with an electrical output of 150 MWe and a thermal output of 114 MWt, which will be a pillar of a reliable electricity and heat supply.

# SELECTED REFERENCES

**Place:** Norway - Oslo Kommune

**Year:** 2020

**Customer:** Balcke-Dürr GmbH

Power plant boiler economizer replacement project. The entire delivery is in the range of 2x ECO type 2 module and 4x ECO type 1 module with the appropriate pressure piping according to the documentation.

## HEAVY STEEL STRUCTURES AND BRIDGES

## Heavy steel structures and bridges

- The workplace for the production of heavy steel structures has 80 x 15 m and is equipped with two cranes with a capacity of 50 tons. This means that we can produce a part weighing up to 100 tons. The monthly production capacity is 200 tons.
- In our milling and planing machines we can prepare both weld bevels and friction joint surfaces of steel structures. If necessary, the weldment can be annealed to release internal stress.
- We provide the necessary inspections and tests of edges, surfaces and welds with our own efforts and with the help of an external accredited laboratory.
- Of course, there is also blasting and corrosion protection. Everything is under one roof without the product leaving the roofed parts of our production.

# SELECTED REFERENCES

**Place:** Frýdek Místek, Czech Republic

**Year:** 2021

Production of 10 pcs of welded I-profiles with average length 20 m, height 4 m and weight of 29 tons.

Delivered total of 291 tons between April and August 2021.

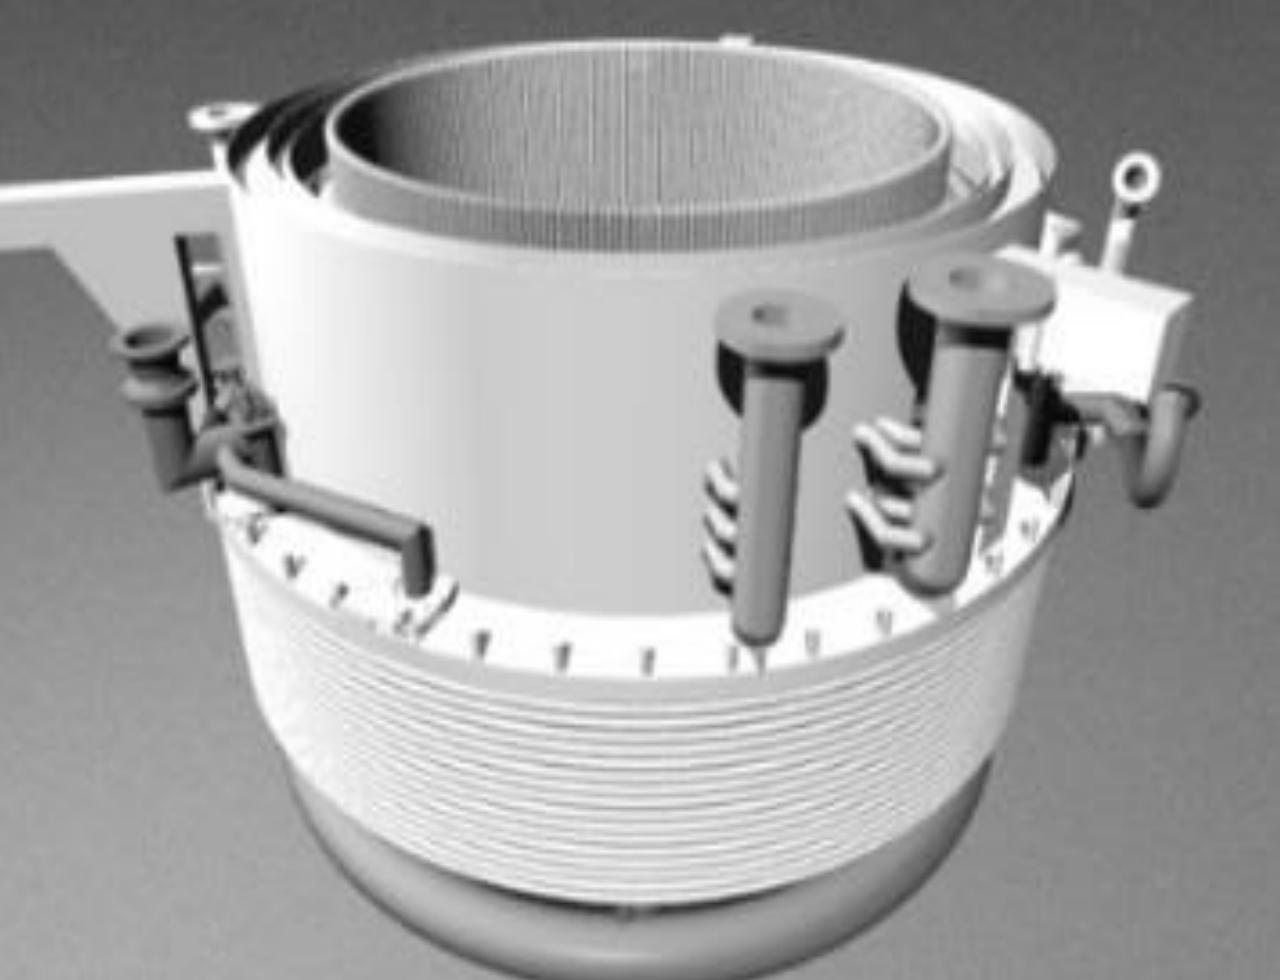

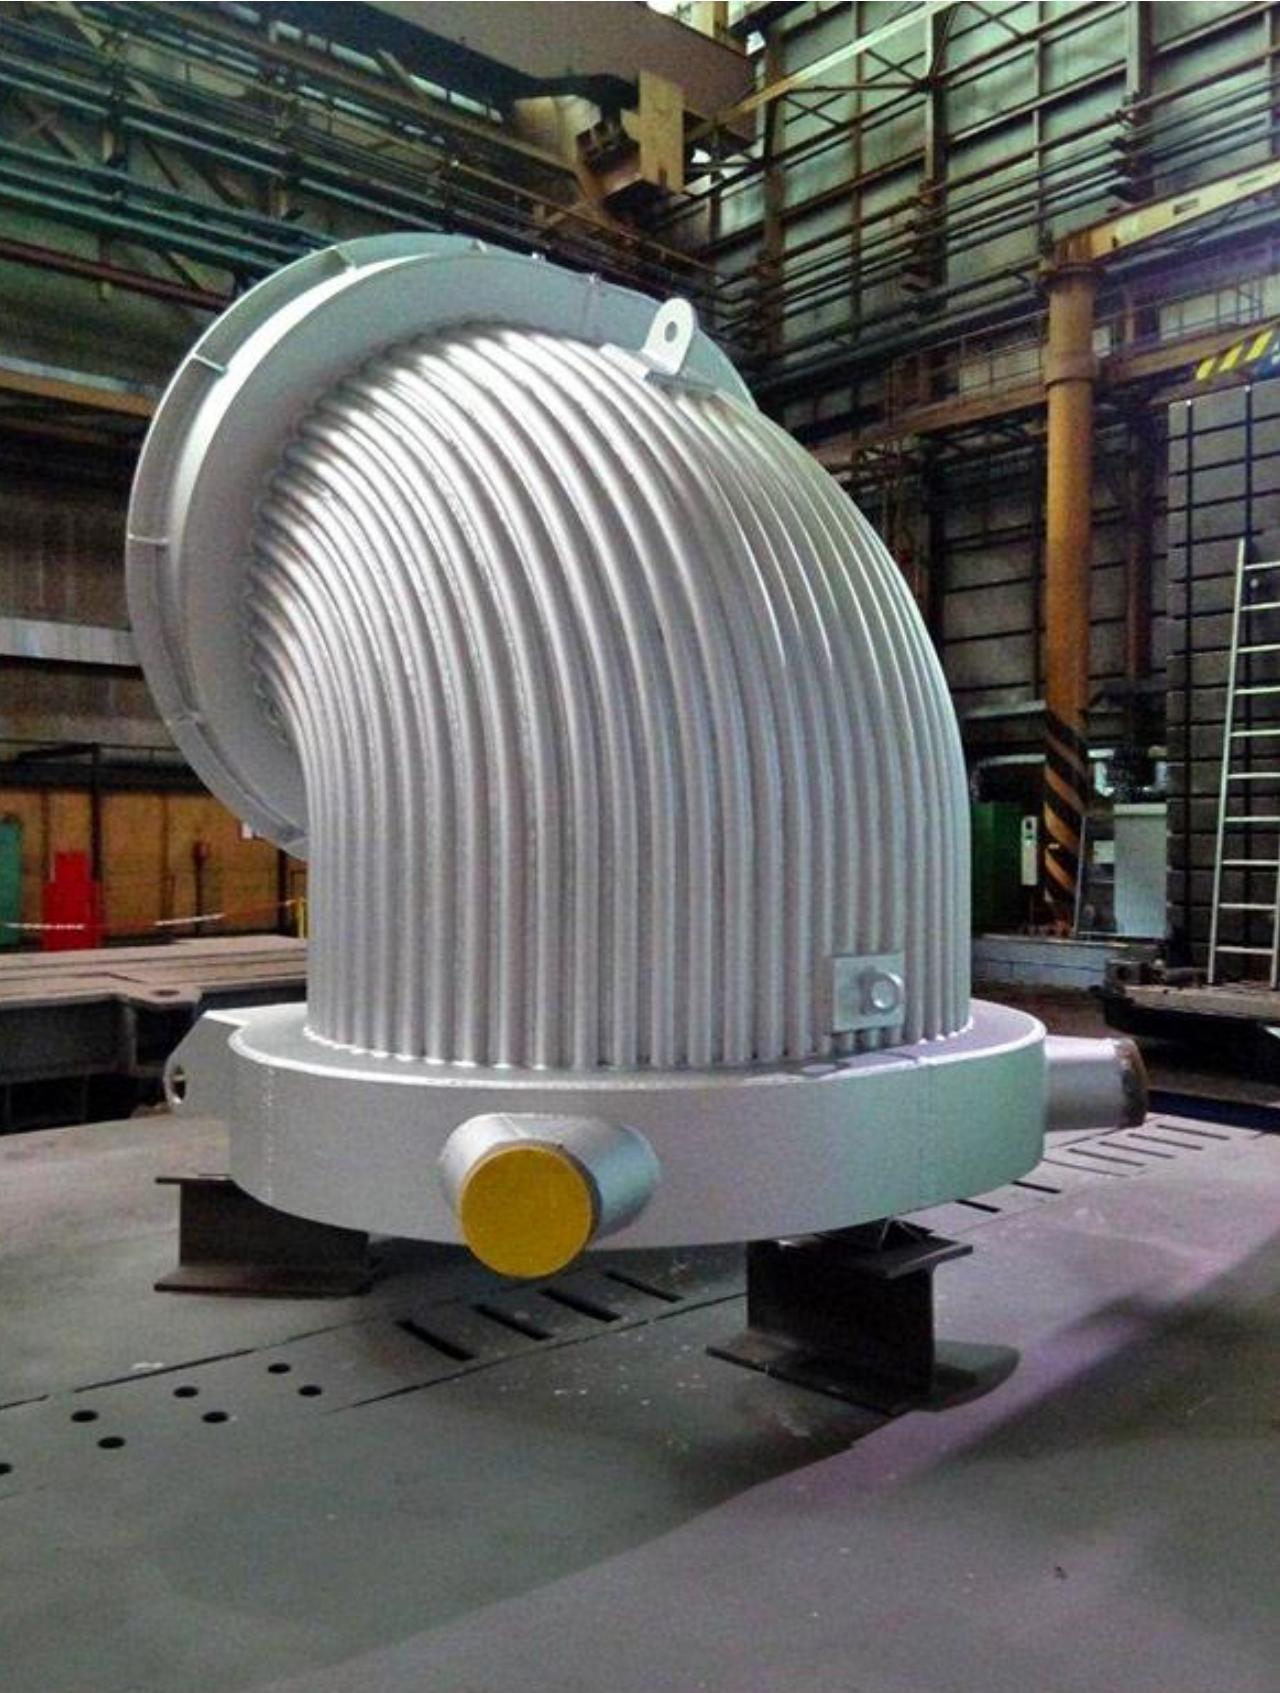

## OTHER PRODUCT FOR INDUSTRY

## Blast furnace shells, tanks, other parts

The company is engaged in the production of parts for other industries, especially equipment for steel mills.

**Supplied product:**

- Blast furnace shells
- Hot blast stove shells
- Material hoppers
- Converter vessels and trunnion rings
- Exhausts
- Casting ladles and superstructures
- Parts of electric arc furnaces
- Gas cleaning parts

# POWER ENGINEERING IN THE WORLD

# CERTIFICATION

VÍTKOVICE ENERGETICKÉ STROJÍRENSTVÍ a.s., aims to supply all products in the highest quality, in accordance with technological procedures and customer requirements.

## Is the owner of several certificates:

- **EN ISO 9001: 2015** - Design, manufacture, installation and servicing of equipment for energy, nuclear energy, ecology, petrochemistry and metallurgy, pipelines, turbine parts, pressure vessels.
- **EN ISO 14001: 2015** - Design, manufacture, installation and servicing of equipment for energy, nuclear energy, ecology, petrochemistry and metallurgy, pipelines, turbine parts, pressure vessels.
- **ISO 45001: 2018** - Design, manufacture, installation and servicing of equipment for energy, nuclear energy, ecology, petrochemistry and metallurgy, pipelines, turbine parts, pressure vessels.
- **ČSN EN ISO 3834-2** - Welding in the production of steam boilers, pressure vessels, pipes and their parts according to EN 12952, EN 12953, EN 13445, EN 13480, AD 2000 HP0, related equipment in power engineering and steel structures in design classes EXC 1 to 3 according to EN 1090-2.

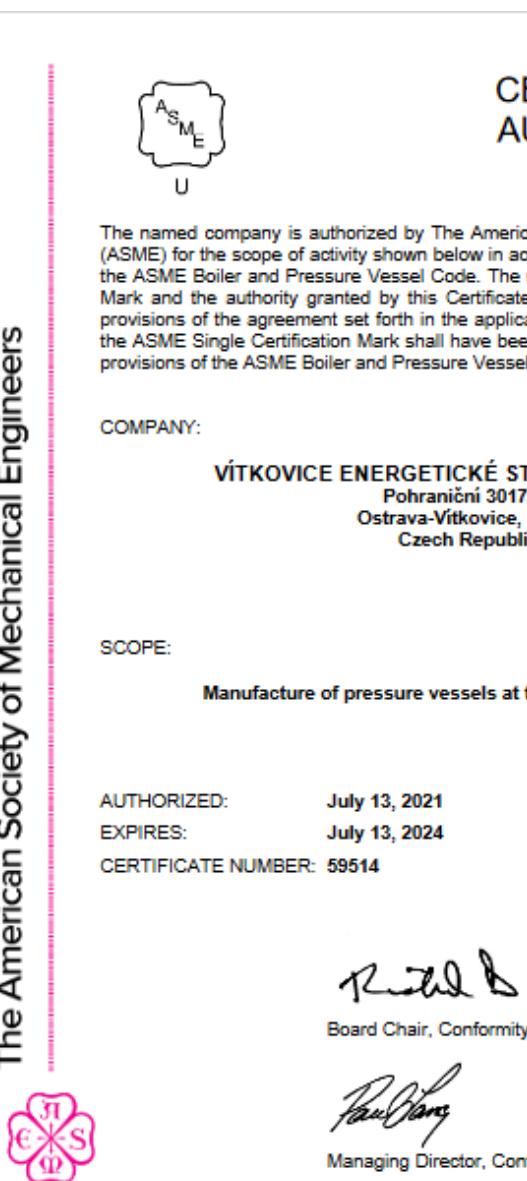

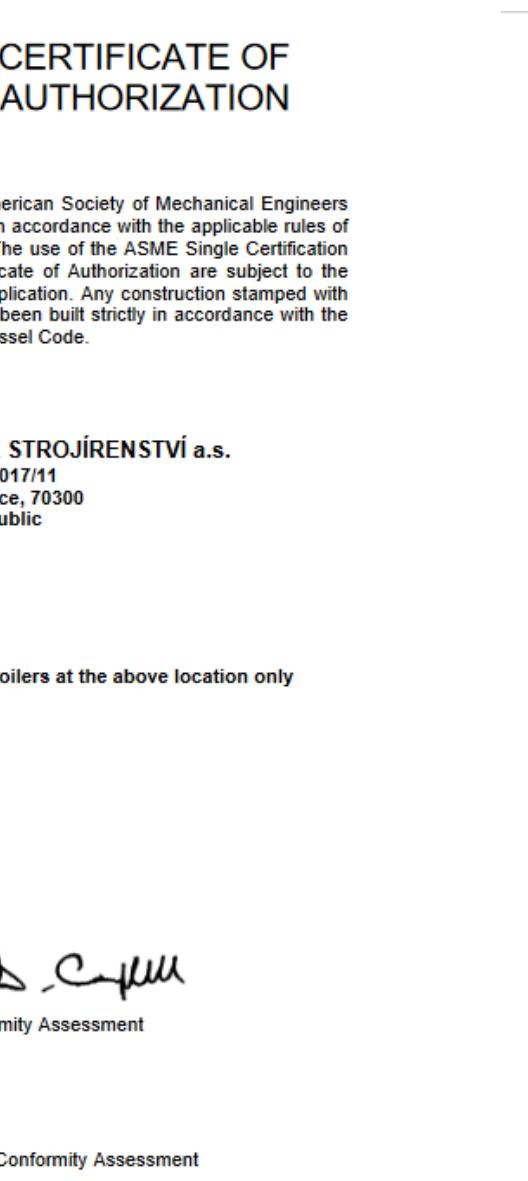

# CERTIFICATION

- **AD 2000 – Merkblatt W0** - Confirmation that the manufacturer has implemented and uses a quality assurance system according to Directive 2014/68 / EU, Annex I, section 4.3 with regard to the listed materials within the scope of authorization. Hot and cold bent pipes.
  - **PED 2014/68/EU** - Confirmation that the manufacturer has demonstrated experience in verifying individual products in accordance with Directive 2014/68 / EU and meets comprehensive quality requirements. Technical regulations: DIN EN 12952 / DIN EN 12953 / DIN EN 13445 / DIN EN 13480.
  - **AD 2000 – Merkblatt HP0** - Verification and recognition of the manufacturer of pressure vessels, steam boilers and pipes according to the rules of AD 2000 - Merkblatt HP0.
  - **ČSN EN 1090-1+A1:2012 EXC3** - Certificate of conformity of production control for steel building components, parts, assemblies and structures of design class up to EXC3 according to EN 1090-1 + A1, Annex ZA.1-ZA.5. Implementation of structure design up to class EXC2

# CERTIFICATION

- Certificate of a qualified supplier ŠKODA JS
- ASME „S“ (59513) – Manufacturing and erection of power boilers.
- ASME „U“ (59514) – Manufacturing of pressure vessels acc.to ASME section VIII, division 1.
- ASME „U2“ (59515) - Manufacturing of pressure vessels acc.to ASME section VIII, division 2.
- Certificate of a qualified supplier ENERGOATOM

# POWER ENGINEERING IN NUMBERS

350

## Pieces for pressure and non-pressure parts of power plants

Boiler drums, pressure parts of boilers, boiler piping, air heaters, steam headers

260

## Parts for nuclear energy

Volume compensators, special secondary circuit heat exchangers (low-pressure and high-pressure heaters), nuclear waste containers

200

## Parts of water, gas and steam turbines

Water, steam and gas turbine housings, runner casing, pressure penstocks and distribution branches

160

## Equipment for the chemical industry

Heat exchangers, reactors, absorbers, condensators, separators, material hoppers, filters

95

## Different types of tanks

Pressure storage tanks, spherical pressure tanks, non-pressure storage tanks, large-volume storage tanks, spherical storage tanks
